CV Writing Service

CV WRITING SERVICE

CV's and application forms are the most common tools used for job hunting & recruitment. This is your first point of contact with a potential employer. The very strict way in which most CV's are judged, means that unless you get it right, your application will not even reach the relevant Head of Department, never mind getting you an interview ! Your application needs to maximize the impact of the information that you give a prospective employer about yourself, by building content and also clarity and focus to the position applied for.

How can we help you ?

- By examining your CV and suggesting relevant changes for any position that you are applying for. This will be a one to one discussion getting your views.
- By asking you key questions to ensure that all your strengths are highlighted and vital skills or information included. These questions are very similar to those asked at an interview and can often be difficult to answer. We need to ensure that you answer accurately & impressively.
- By showing you those aspects of your personal qualities that are relevant for any particular vacancy. This is important for the many students who have never had any previous work experience.
